

Fruity Baby Rice Cereal

**Makes 6 portions **Suitable for freezing

Baby rice cereal is a valuable first food: it is easily digested and has a milky taste that helps to ease your baby's transition from a purely milk diet to solids. It may be served plain or combined with a purée.

1 Tbsp. sugar-free, vitamin and iron-enriched baby rice cereal

3 Tbsp. breast milk or formula

4 Tbsp. first fruit purée

Mix together the baby rice cereal and milk according to the instructions on the box, and stir into the fruit purée to give it a slightly creamy texture.

Pour purée into an ice-cube tray and freeze.

TIP: Pear, peach, or plum purée mixed with baby rice cereal is often popular with babies.
